

REMARKS

Introductory Matter

In the Notice to File Corrected Application Papers mailed on January 14, 2011, certain specification/drawing inconsistencies were identified. Specifically, it was suggested that “page 59 of the specification refers to Fig. 1 and 2, but no drawing with that designation is described in the brief description of the drawings and no drawing with that designation is present in the application.” Applicants were invited to correct the informalities with an amendment in compliance with 37 CFR 1.121. Specifically, applicants were asked to correct the specification in either of two ways including amending the specification to remove all references to that drawing. Accordingly, applicants have submitted herewith specification amendments that remove reference to each of Figures 1 and 2. Those amendments are discussed in further detail below. These amendments add no new matter.

Although applicants believe that the specification amendments presented herein satisfy the requirements of 37 CFR 1.121, applicants also submit herewith a clean substitute specification in compliance with 37 CFR 1.125(b) and 1.125 (c) which excludes the claims but includes all of the desired changes (e.g., the amendments to paragraph [0066] and deletion of the text of paragraph [0067] at page 59) and the abstract. Additionally, and to comply with 37 CFR 1.125 (b), applicants reiterate that these specification amendments add no new matter.

The Specification Amendments

Applicants add the “CROSS REFERENCE TO RELATED APPLICATIONS” section to set forth the priority claim in the above-identified application.

Applicants have also amended page 59, paragraph [0066] to remove reference to Figure 1 and have deleted the text of paragraph [0067] to remove reference to Figure 2.

These amendments add no new matter. Their entry is requested.

Conclusion

Applicants respectfully request that the remarks be considered and the above amendments be entered.

Respectfully submitted,

/Michael C. Badia/
